Weather & Wellness — Comprehensive Assessment Evidence Report

Student Name: Mohammed Khan | **App Package:** au.edu.jcu.assessment.utilityapp

1. Code Quality & Sub-Packages Architecture

• **Quality:** 0 warnings / 0 errors (build, lint, unit tests). Modularized sub-packages: data, ui.viewmodel, ui.screen, ui.components, ui.theme.

2. App Purpose, API & Functionality (Portrait & Landscape)

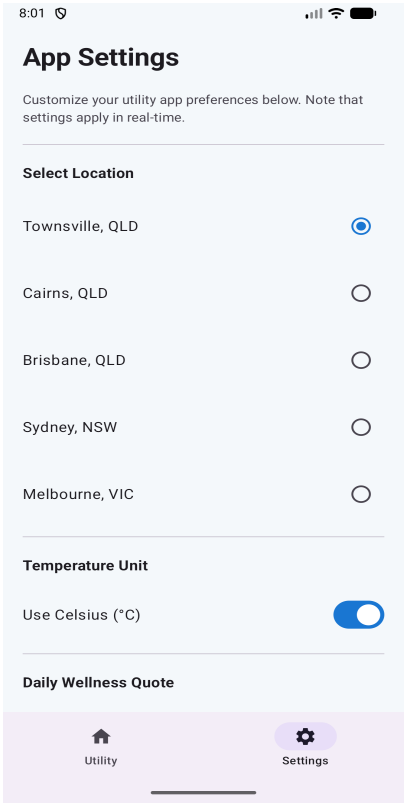

• **Purpose & API:** Weather forecast + mindfulness quotes using Open-Meteo REST API, Retrofit 2, Coroutines, and ViewModel.

• **Responsive Layouts:** Supports portrait (stacked cards) and landscape (two-pane side-by-side with a vertical border line, non-scrollable).

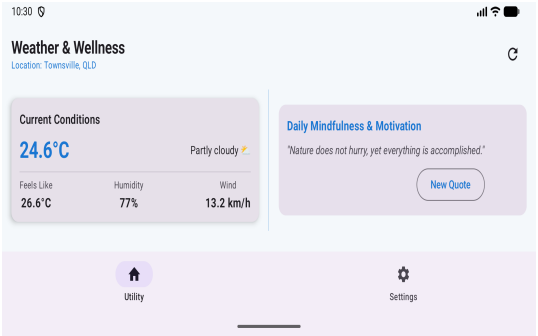

3. Application Screenshots (Portrait, Settings & Landscape)

Main Dashboard

Settings Screen

Landscape View (Side-by-Side)

4. Student Reflection

Building **Weather & Wellness** deepened my expertise in Jetpack Compose Material 3, Retrofit, Coroutines, ViewModel, and clean sub-package architecture. Implementing responsive portrait and landscape layouts with a border separator ensured a professional user experience across orientations.
