Weather & Wellness — Assessment Evidence & Rubric Report

Student Name: Mohammed Khan | **App Package:** au.edu.jcu.assessment.utilityapp

1. General Code Quality & Theming

• **Code Quality:** 0 warnings / 0 errors across build, lint, and unit tests. Clean package structure (ui and data).

• **Logo & Theme Consistency:** The app's Material 3 color palette (Sky Blue & Sunny Amber) directly matches the custom sun-and-clouds adaptive launcher icon.

2. App Purpose & Functionality

• **Purpose:** Combines real-time weather forecasting with daily mental wellness and mindfulness quotes.

• **Features:** Live weather data (Open-Meteo API), city selector, °C/°F temperature unit toggle, and daily motivational quotes.

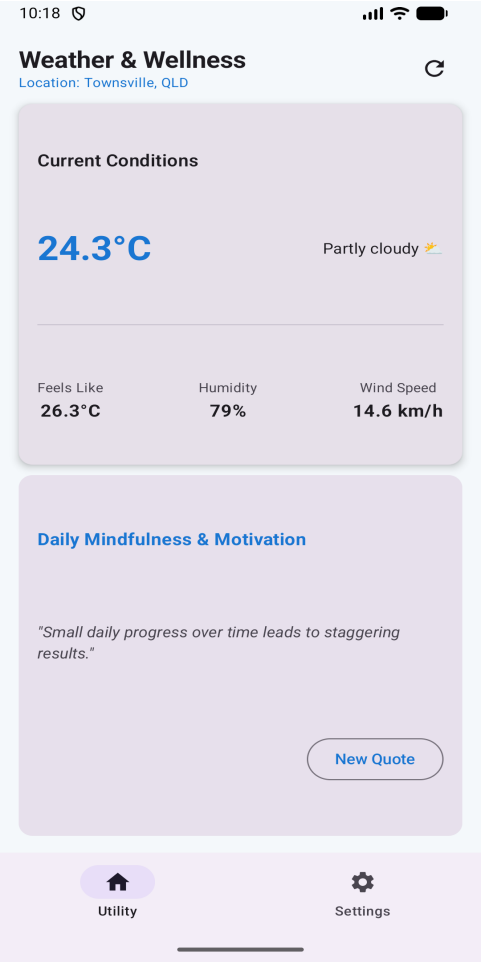

3. API Usage & Architecture

• **Retrofit:** Asynchronous REST API calls via Retrofit 2 + Gson converter and Kotlin Coroutines (suspend).

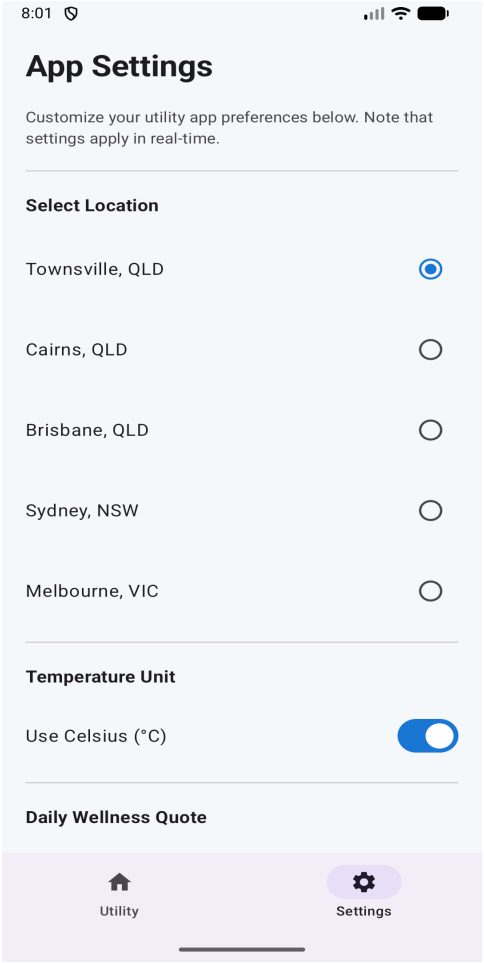

• **ViewModel:** Reactive state management using Jetpack ViewModel and Compose mutableStateOf.

4. Application Screenshots Evidence

Below are visual evidence screenshots of the main dashboard and settings screen:

5. Student Reflection

Building **Weather & Wellness** was an invaluable learning experience. I mastered Jetpack Compose Material 3 UI design, Retrofit API integration, and Kotlin Coroutines. Ensuring brand consistency between the launcher logo and app color theme made the app feel polished and professional.
